

Follow-up question on excavation of landfill at DOE Mound site  
Dan Gravatt to: TIMOTHY FISCHER

04/16/2012 02:34 PM

Tim,

You may or may not recall discussing the DOE Mound landfill site with me a couple of years ago, but I am still working on a similar site in St. Louis and dealing with similar questions on whether or not to dig radiologically-contaminated waste out of a landfill. As part of our line of evidence highlighting the potential groundwater issues associated with digging into the waste mass, my management would like me to obtain before-and-after groundwater plume concentrations you encountered during the Mound landfill excavation work. Is there a document you could provide me that contains a summary of this data?

Thanks,  
Daniel R. Gravatt, PG

Principles and integrity are expensive, but they are among the very few things worth having.
